SUMMARY

AI Engineer with 3+ years of experience specializing in Generative AI, Multimodal AI, LLM development, AI Agents, and automation workflows. Skilled in building scalable AI systems, multimodal content pipelines, intelligent automation, and full-stack AI applications using Python, Django, React Native, and modern LLM frameworks.

EDUCATION

RAJIV GANDHI PROUDYOGIKI VISHWAVIDYALAYA

Bachelor of Computer Science and Engineering

Bhopal, India

May 2025

Relevant Coursework: CS Fundamentals, Software Engineering; Operating Systems; Algorithms and Data Structures; Artificial Intelligence and machine Learning; Database Management System; and Networking Fundamentals.

TECHNICAL SKILLS

AI Agents & Automation: AI Agents, Agentic Workflows, Multi-Agent Systems, Task Planning, Workflow Orchestration, Autonomous Document Processing, LangChain, LangGraph

LLM Development: RAG, Vector Search (Pinecone, Chroma, FAISS, AstraDB), LLM App Development, Prompt Engineering, Function Calling, Tool Calling, Hybrid Retrieval, Fine-tuning

AI/ML & Data Science: PyTorch, TensorFlow, Transformers, Scikit-learn, Computer Vision (YOLO, ResNet, OpenCV), NLP (NER, Summarization, Sentiment), Time-Series Forecasting, Anomaly Detection

Backend & Databases: FastAPI, Django, Flask, Node.js, Express, PostgreSQL, Firebase, Redis, DuckDB, Vector Databases, REST APIs, Microservices

Developer Tools: Git, GitHub, Docker, Linux, Selenium, BeautifulSoup, Pandas, NumPy, Jupyter, CI/CD, MLflow, Airflow

WORK EXPERIENCE

SOFTUDE INFOTECH PVT. LTD.

Indore

AI ML Engineer

- Designed and deployed end-to-end machine learning, deep learning, and Generative AI systems, covering NLP, CV, multimodal processing, and intelligent automation.
- Built practical AI solutions using CNNs, RNNs, Transformers, diffusion models, and large language models, depending on project needs.
- Developed multimodal pipelines combining text, image, audio, speech, and structured data for tasks like document intelligence, catalog automation, product tagging, and creative asset generation.
- Implemented scalable LLM applications with RAG, vector search, embeddings, hybrid retrieval, and domain-specific tuning to improve accuracy and contextual relevance.
- Created AI automation and content workflows (copy generation, image editing, creative variations, video snippets, voiceovers) using OpenAI, Gemini, Stable Diffusion, and internal APIs.
- Designed and deployed AI agents that performed task planning, data extraction, tool calling, and automated content refinement—reducing repetitive manual effort across teams.
- Built backend AI services using FastAPI, Django, and Node.js, optimizing inference pipelines for low latency and high throughput.
- Leveraged MLOps practices including experiment tracking, model versioning, monitoring, drift detection, and automated retraining.
- Integrated multiple multimodal foundation models (LLMs, VLMs, ASR/TTS models, diffusion models) into unified production systems.
- Collaborated with product, design, and data teams to translate vague business problems into stable and scalable AI-powered production features.

RA SOFTWARE -- (Remote)

Jaipur Rajasthan

Backend Developer Intern

- Engineered and maintained full-stack web features using Django and REST APIs, enhancing system performance and reliability.
- Built and integrated scalable database models and backend logic, ensuring efficient data flow across the application.
- Collaborated in an Agile team environment, actively participating in sprint planning, code reviews, and continuous integration workflows.

PROJECTS

HEALTHSYNC (An AI based Diet Recommendation System)

- Built a health and wellness app that creates customized diet plans using adaptive machine learning models.
- Implemented user progress tracking and automatic plan adjustments based on feedback and usage.

OTHER PROJECTS

- HeartSync** – Social & Dating App: Developed a React Native + Django-based app for interest-based matching and schedule-synced friend suggestions for college students.
- SaaS Boilerplate:** Built a scalable, Dockerized SaaS starter template with auth, team access, Celery background jobs, and Neon Postgres.

LANGUAGE & INTEREST

Areas of Interest: Artificial Intelligence, Machine Learning, DevOps, Cybersecurity

Languages: Hindi, English
